

AC Sundancer™

Clone Name P. "WS-151E"
Gender Male
Parentage Mother: *P. Walker* (Open pollinated *P. deltoides* var. *occidentalis*)
 Father: *P. x canadensis* "serotina de selys"
Origin : AAFC-STB Agroforestry Development Centre, Indian Head, SK
Breeding Year 1979 (Carl Lindquist)
Field Selection 1986 (William Schroeder)
Released 2012 (AAFC-STB Agroforestry Development Centre)
Licensed 2012 Canadian Ornamental Plant Foundation Reg. # 9642

Morphological Traits	Description
Trunk	Central trunk with ascending branches
Crown Form	Fastigiata
Branch Angle	30-40°
Budburst	Mid-Spring
Budset	Mid-Fall
Leaf	Deltoid with a broad wedge shaped base and acuminate tip; lower surface greyish green, margin coarsely serrate; petiole green, less than half length of blade
Twig	Ribbed greenish to light brown; linear vertically oriented lenticels; buds ovoid, gummy; leaf scars three-lobed
Bark	Smooth, greyish or creamy green at apex, furrowed grey at base

Trait Characteristics	Low	Medium	High
Fall/Spring Hardiness			X
Drought resistance		X	
Sunscald Susceptibility	X		
Flood Tolerance		X	
Septoria Resistance			X
Rust Resistance		X	
Growth Rate			X
Rooting Capacity			X

Recommendations	Description
Utilization	Agroforestry, landscaping
Soil	Grows well on a variety of soils, pH <7.5
Plant Hardiness Zone	Zones 1 - 4
Notes	Good stoolbed and steckling production, resistance to bronze leaf disease, non-suckering, Longevity > 40yrs.
