

CanAm

Clone Name: P. "71-131W"

Gender: Female

Parentage: **Mother:** P. Walker (Open pollinated *P. deltoides* var. *occidentalis*)
Father: Unknown

Origin: AAFC-PFRA Shelterbelt Centre, Indian Head, SK

Breeding Year: 1973 (Carl Lindquist)

Field Selection: 1986 (William Schroeder)

Released: 1995 (AAFC-PFRA, USDA-ARS & USDA-NRCS)

Morphological Traits	Description
Trunk	Slightly curved
Crown Form	Spreading
Branch Angle	45-50°
Budburst	Mid-Spring
Budset	Mid-Fall
Leaf	Deltoid with a straight base and acuminate tip; lower surface greyish green, margin serrate; petiole yellow-green, greater than length of blade
Twig	Cylindrical, greenish to light brown; linear vertically oriented lenticels; buds ovoid, gummy; leaf scars three-lobed
Bark	Smooth, greyish or creamy green at apex, irregularly furrowed with corky protrusions at branch scars

Trait Characteristics	Low	Medium	High
Fall/Spring Hardiness			X
Drought resistance			X
Sunscald Susceptibility	X		
Flood Tolerance		X	
Septoria Resistance		X	
Rust Resistance	X		
Growth Rate		X	
Rooting Capacity		X	

Recommendations	Description
Utilization	Agroforestry, landscaping, biomass, reclamation, phytoremediation
Soil	Grows well on a wide variety of soils
Plant Hardiness Zone	Zones 1-4
Notes	Good stoolbed and steckling production, Outstanding drought resistance, Longevity > 40yrs.
